- Bottom 10 SKUs cluster at 1.05 : 1.46%, pointing to common issues (pricing, pack, promo, distribution).

- Cosmetics leads with highest average Efficiency Score (3.18%), followed by Skincare (2.58%) and Haircare (2.44%).

- Best SKU (SKU85) hits 11.13%; worst SKU (SKU30) is 1.05%.

- Haircare has the longest lead time (41 days); Cosmetics is shortest (33 days).

- Haircare is 24% longer than Cosmetics—cutting 5–8 days will drive biggest impact.

- Longer lead times increase defect rates (upward trend).

- Risk zone: 45–50 days; Safe zone: 30–35 days.

- Air is fastest but costly; Sea is cheapest but slowest.

- Cosmetics shipping costs are highest focus on optimizing its routes/modes.

- Use Route B or C for urgent shipments; Sea for cost-sensitive SKUs.

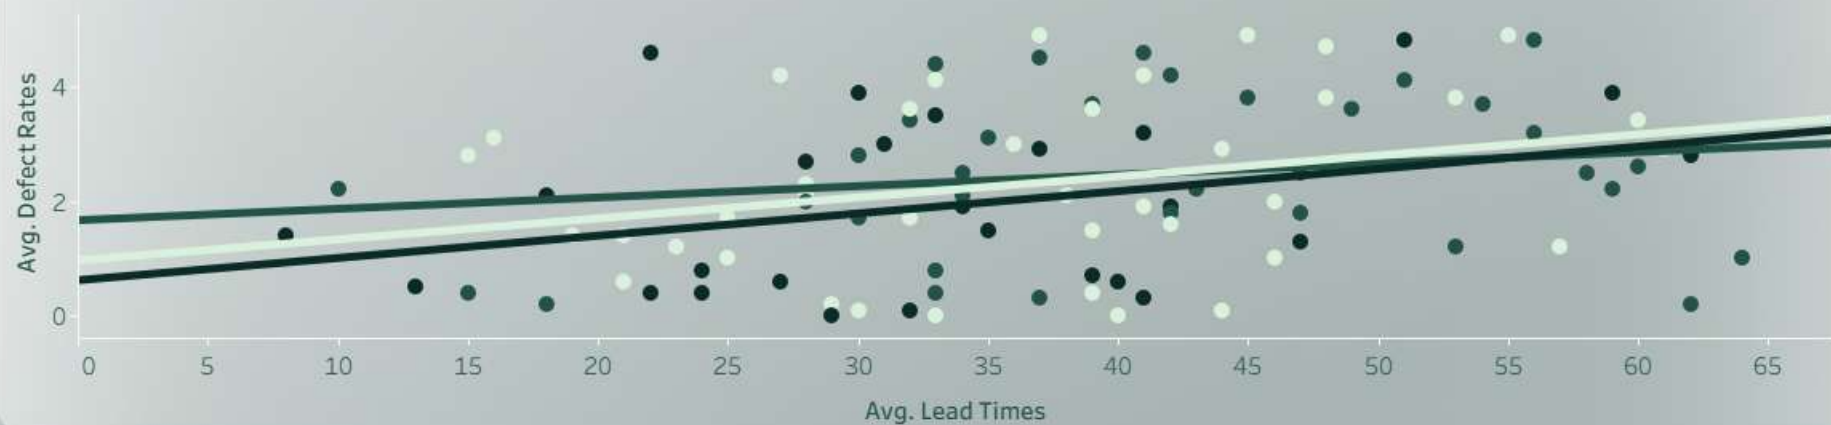

- Carrier B offers best balance (speed + cost).
